

ADVANCED TECHNOLOGY FOR SUPERIOR ALL-ROUND PERFORMANCE

F05 series forklifts are now equipped with a new 2-stage stator torque converter that helps to improve allround work efficiency by providing smoother, fatigue-free

operation. Making it unnecessary for the operator to shift from low to high gear (1st → 2nd), the 2-stage stator torque converter is designed to eliminate shift shock. This greatly improves operator comfort—especially during long work shifts—and reduces the possibility of rocking the pallet when accelerating the forklift.
